1974 ANNUAL KING and QUEEN

Wes White—Luan Foreman

DEDICATION

The 1974 Pirate Log is dedicated to the Riverside Student Body. Every student from the greenhorn seventh-grader, to the worldly-wise senior, plays an important part in this book. Locked within memories to be cherished, laughed about, mulled over or possibly be embarrassed. But within it all . . . . .

are you, the student . . . . . and the year 1974.

Thank You

The Three Types Of Geothermal Energy
Hot Rock
Hot Rock
Man's conversion method of Hot Rock is to drill one to two miles below the surface, create an artificial cavity, drill a second well then pump water down the first. Instantly steam shoots up the second well which is connected to turbines.
Hot Water
Man's conversion method of Hot Water is to transfer its heat to a secondary fluid wh
its steam will drive turbines.
Steam
Steam
Man's conversion method of Steam is to tap a natural de-
posite of steam, such as geyse
The steam is filtered. Ther
it passes through turbines.
Geothermal Energy
Problem: To demonstrate the process of producing geothermal energy.
Equipment: Water, burner, steam boiler, rubber hose, turbine and generating switch box.
Procedure: Put the water into the steam boiler and set it on the burner. Plug in the burner. Hook the hose onto the steam boiler and set the turbine and generating switch box behind the hose.
What happened: The water boiled and steam came out slowly. To make the pressure in
e boiler build up pinch the hose. Let the
essure build up for about thirty seconds
n let it out
The pressure
eam will turn the turbine.

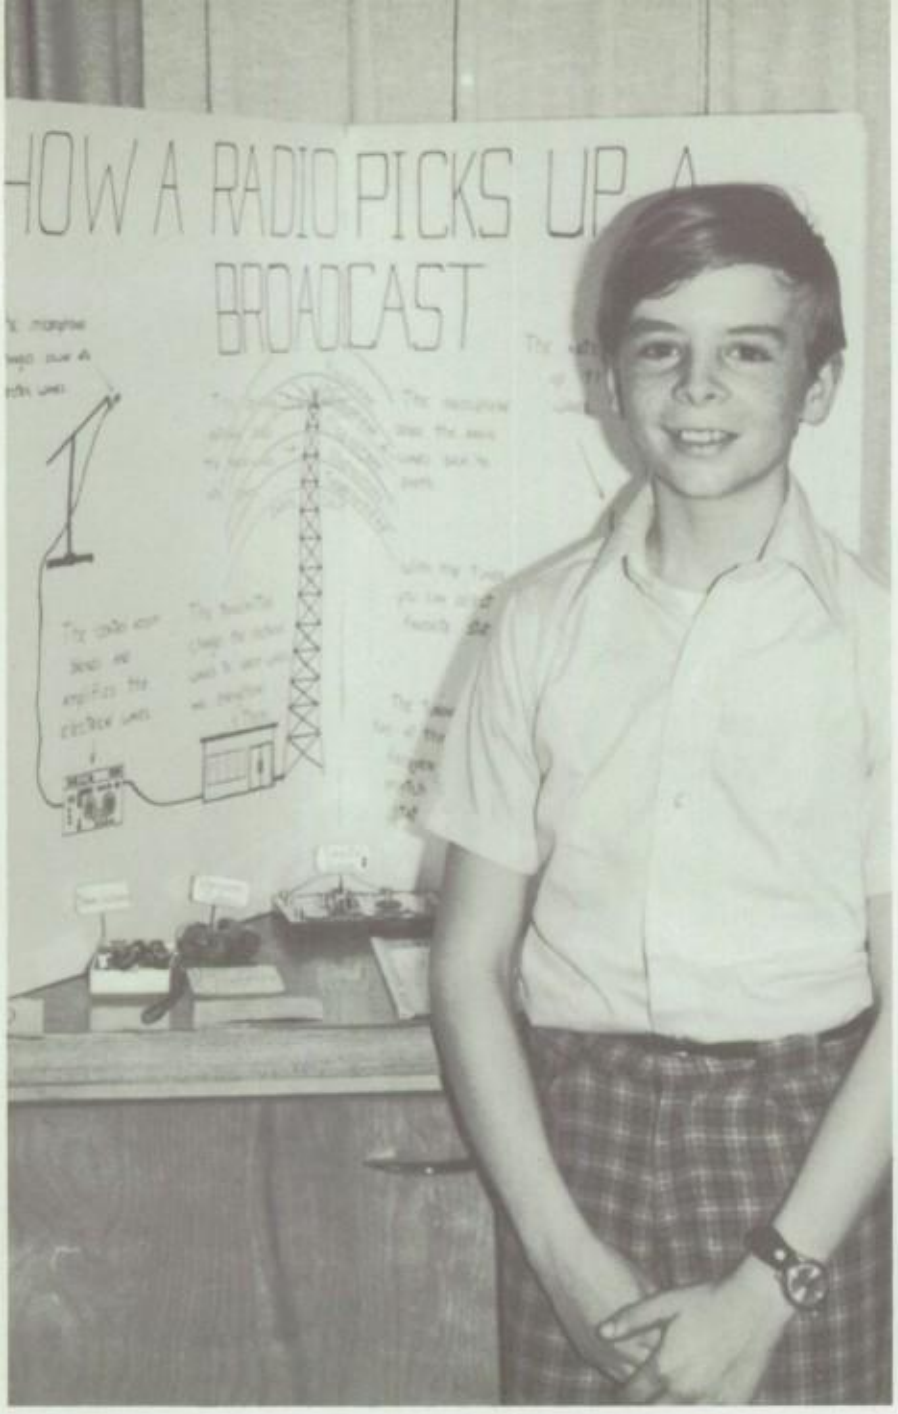
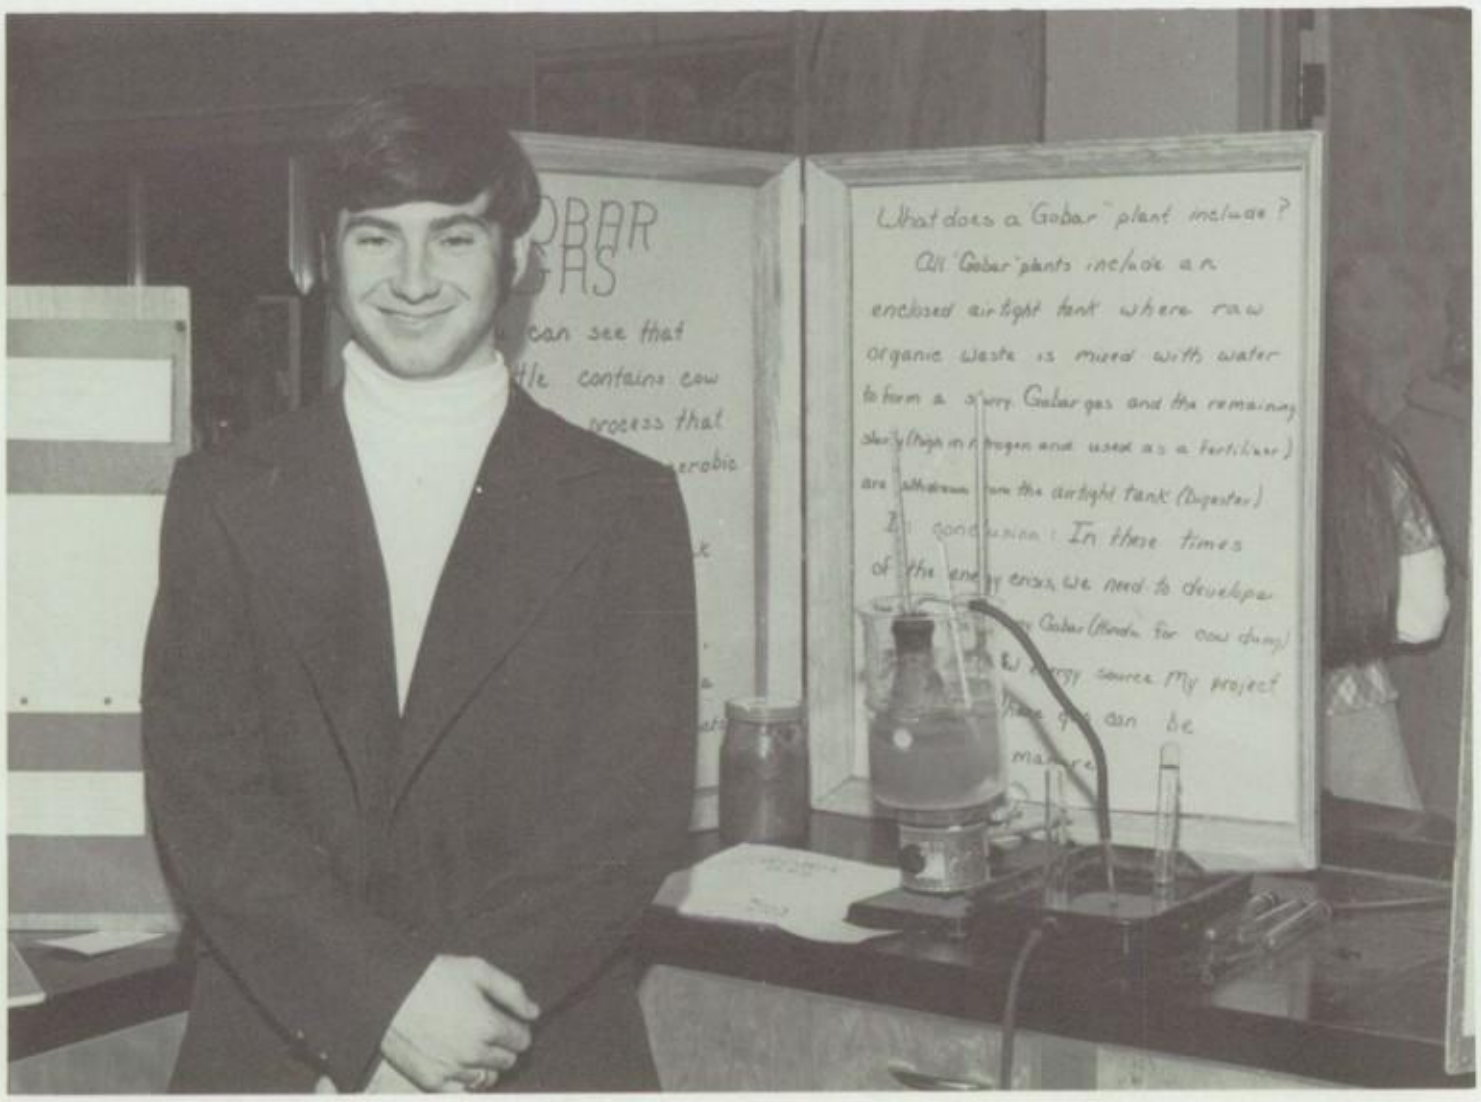
SCIENCE MATH DAY





What does a "Gobar" plant include?
All "Gobar" plants include an
enclosed air tight tank where raw
organic waste is mixed with water
to form a slurry. Gobar gas and the remaining
slurry (high in nitrogen and used as a fertilizer)
are withdrawn from the air tight tank (Digester)
In conclusion: In these times
of the energy crisis, we need to develop
Gobar (Hindu for cow dung)
energy source. My project

I would like to express my thanks to the people who made this book possible. First of all, to my staff for their hard work. Also Mrs. Heath, she worked as hard as any staff member. A special thanks goes to Mr. Bob Callender, for his help on the division pages. Last but certainly not least . . . a big thanks to Wes Mirick, our representative from Paragon. When in time of doubt, he always had the answer.

Jane Dye, Editor '74
